

MMCC Guide for Fire Marshal Inspections

Grows

- **Natural Grows** – Requires an inspection. This is created automatically from the MMCC that you will apply for. The inspector will call to set up the inspection. Be sure all related construction has been completed so we can do this inspection.
- **CO2 Enhanced Grows** - Requires an Operational Permit and an Inspection

Extraction/Processing/Testing – Requires an Operational Permit and an Inspection

Submitting for an Operational Permit – Go to okc.gov website:

<https://www.okc.gov/departments/fire/permits-inspections-code-enforcement/permits> .

Select the appropriate application/s. Fill out the application completely do not leave spaces blank, if the answer is N/A or zero, fill that in. For example, if you are a processor and do not extract or use hazardous materials then you would write N/A in the spaces associated with extraction or hazardous materials. A detailed floor plan labeling rooms, equipment and hazardous materials (if any) used in the operation, gas detection, audible/visual alarm device locations, and a detailed description of the operation should be submitted with the application. Submit a paper and electronic copy of the application, plans, and description of operation to Fire Prevention, 2300 General Pershing Blvd, OKC. AHJ Policies & Procedures for CO2 Enhanced Grows, Extraction, Processing, and Testing are available on the okc.gov website:

<https://www.okc.gov/departments/fire/permits-inspections-code-enforcement/ahj-policies-procedures>

Please contact us at fireprotection@okc.gov if you have any further questions or concerns.
