

Reliable. Essential. Affordable.

The Oklahoma City Water Utilities Trust provides clean, treated drinking water that supports your health, your home and your business.

The True Value of Water

Water is essential for everything we do. From our first morning cup of coffee to brushing our teeth before bedtime, we rely on clean, safe drinking water everyday.

The OKC Water Utilities Trust manages **seven water supply reservoirs**, maintains more that **7,000 miles** of combined water and wastewater pipelines, and treats and delivers an average of **100 million gallons** of quality water every day to over **1.4 million people** in Central Oklahoma.

We are investing more than **three billion dollars** in infrastructure improvements over the next ten years to strengthen system resiliency and secure our water supply for future generations.
