

EARTH-KIND® WORKSHOP

Celebrate Earth Month by joining us for a workshop to learn natural gardening practices, soil health improvement options, and how to choose native, tough plants and trees to attract butterflies and other pollinators.

Saturday, April 16

9:00 a.m. - 12:00 p.m.

Will Rogers Gardens Exhibition Hall

3400 NW 36th St

Registration is required at okc.gov/parks

Cost is \$10 and includes lunch

Consider improving your soil with compost. Compost adds valuable nutrients and increases water holding capacity while reducing kitchen and yard waste sent to the landfill.

Attract pollinators by planting a variety of nectar and pollen-rich flowers. A mix of plants that flower at different times ensure pollinators hang out for the entire growing season.

Incorporate native and adapted plants that need less water. Need help choosing the right plant or tree? Check out the Plant Database on SqueezeEveryDrop.com!

Let nature help you water. Use a rain gauge to measure how much rain reaches your plants. Adjust your watering schedule to take rainfall into account.
