**TYPE III BARRICADES**

---

Type III barricades are required for all road closures. The barricades must be placed in accordance with Manual on Uniform Traffic Control Devices (MUTCD) guidelines. It is important that you choose a contractor that understands these guidelines and places your barricades correctly. Talk to the [Event Permit Coordinator](#) if you have trouble finding a contractor. A copy of your barricade contract must be provided at least 45 days prior to the event.
