

Resolve to Recycle Right!

This year, join your friends and neighbors and learn to recycle right. Not sure how? Start with A-B-C.

- A** Aluminum and steel cans (empty, clean and dry).
- B** Bottles and jars, including glass, aluminum and plastic ones (empty, clean and dry).
- C** Cardboard boxes, cartons (clean and flattened) and paper.

For more recycling tips, visit okc.gov/recycle.

Ring in the New Year with water savings.

Upgrade your old faucets, toilets and showerheads with models that meet WaterSense criteria for water use efficiency set by the U.S. Environmental Protection Agency.

WaterSense products are certified to use at least 20% less water, saving you money in the long-run, and helping conserve our water supply. The bonus? They perform as well or better than regular models.

Americans have saved more than 4.4 trillion gallons of water and \$87 billion in water and energy expenses by making the switch.

Saving water just makes sense -- WaterSense!
