

The City of
OKLAHOMA CITY
Utilities Department

Get to Know Your H₂O

Clean, reliable drinking water plays a vital role in health, public safety and quality of life.

Learn how the **Oklahoma City Utilities Department** treats and delivers your drinking water to meet all Federal and State regulatory guidelines by reading our annual **Drinking Water Quality Report** (also known as a Consumer Confidence Report).

Scan the QR code or visit okc.gov/ccr to read the 2023 report.

Are you **ODD** or **EVEN**?

In 2013, the City of Oklahoma City implemented a permanent, mandatory **Odd-Even** outdoor watering schedule. The schedule applies to all outdoor irrigation, including in-ground sprinkler systems AND conventional sprinklers. Hand watering is exempt.

- If your house address ends with a **1, 3, 5, 7 or 9**, water on **ODD-numbered** days.
- If your house address ends with a **0, 2, 4, 6 or 8**, water on **EVEN-numbered** days.

Most turfgrasses don't need more than 1" of water per week, so two weekly waterings are sufficient. Two longer soakings is better for root growth than multiple, shorter waterings. Visit squeezeeverydrop.com for more outdoor watering tips!
