

**Help prevent
trash truck
fires.**

Truck fires are dangerous for our drivers and other vehicles on the road. They also create a big, trashy mess.

Keep the following out of your Big Blue cart.

Motor Oil and gasoline containers.

Propane tanks.

Paint thinner, caustics.

Pool chemicals.

Soak used ashes and charcoal in a bucket of water overnight before bagging and putting them in your cart.

Because FOG clogs don't always happen in one day.

Small amounts of fats, oils and grease (FOG) poured down the sink daily are enough to cause big problems in the future.

Avoid FOG clogs and pour leftover **fats, oils and grease** into a can, jar or other lidded container, then cover and freeze it until solid.

When the container is full, toss it in with your regular trash.
